The Jetway JNC9C-550-L is equipped with Intel Atom N550 CPU (2x1.5Ghz, 8.5W TDP), 2x Gigabit LAN and Mini-PCI-E slot. Therefore it is a perfect platform for appliance applications like firewalls or routers.

It gets even more attractive when adding a 3xLAN daughter board which enables you to build Multi-WAN routers with 5x Gigabit LAN connectors. When you also add a WLAN Mini-PCI-E card you can use the system as an access point.
